

LIQUID G. Overdose

Catalog EKPCD027 Format CD, Digipak Release date 2013, June 14 Genre Electro Style Industrial, Electro-Punk

LIQUID G. Belgium

New and great enterprises by the hyper-productive Peter VB, Belgian solo-project of electro-punk/industrial/EBM inspiration.

Reduce him of the twenty-fifth anniversary on the scene and author of a discography of cult, the protagonist reveals once again in this album "Overdose" to have a strong charisma and the desire to conquer more and more fans by fifteen deadly sonic-weapons that will energize your technologic dances through minimal midtempo rhythms, vocals immersed in echoes, reverberations and alienating melodies.

The release guarantees entertainment at the highest levels exercising a subjugating power into the listener who will feel itself as the real protagonist in a world of distorted sounds, so glacial and impure, often combined with a futuristic climax of constant tension: all these elements will be injected at high doses in your ear canals to reach directly the brain.

The return of Liquid G. is synonymous of a superior force able to attract without give you any possibility of escape from its spirals: pre-alarm state activated.
